PROJECTS

I strive to utilize semantically accurate HTML to assist search engines, screen readers, and other user devices determine the significance and context of my coded content. I use a mobile first approach and build responsive pages, using CSS Flexbox and Grid, which function on all screen sizes.

Designer Portfolio
Multi Page website portfolio for a UI/UX designer.
- Created the website according to Figma style-guides and prototypes provided by the UI/UX designer for which it was built.
- Manipulated the DOM using JavaScript to create features such as 'animated on-click' navigation buttons, drop down menus, and toggle effects that open and close various features.

Recipe Application
Users can run customized searches for recipes by entering ingredients and selecting options.
- Implemented React Hooks to fetch API data and utilized try/catch statements to handle errors.
- Wrote algorithms which alter API calls to produce varying results.
- Created React components that were imported into multiple pages from which props were passed.
- Used local storage to pass and render API data from page to page.
